III. For Schedule A and the supplement to Schedule A to the said Order, the following Schedule shall be substituted, namely :—

SCHEDULE A

(See clause 2 and 9)

EXPLANATORY NOTE.

1. *The Different Parts of the Schedule.* Part (i) includes common medical preparations which contain the same active ingredient as many preparations manufactured by different firms under difierent names. The maximum prices specified in Part (i) will apply to any such preparation which is not included in Part (ii) under its proprietary name. Pharmaceutical chemicals are shown in Part (iii). Infant and Patent Foods and allied articles are shown in Part (iv).

2. *Prices to be treated as maxima.* The ceiling prices are maximum prices and any controlled drug may be sold at a lower price than the ceiling price fixed for the drug.

3. *Part (iii) prices.* The prices fixed in Part (iii) are for chemicals of standard pharmacopoeial quality. They do not apply to chemicals sold for industrial purposes or to chemicals of inferior quality, the prices for which should be considerably cheaper. On the other hand these prices do not also apply to chemicals of a higher standard of purity which are intended for laboratory work or for use as analytical re-agents.

4. *Wholesale and Retail prices to be nett.* Except as provided in paragraphs 8, 9 and 10 the ceiling retail prices for drugs purchased at the retailer's place of business are inclusive of all incidental charges such as cost of containers, freight and packing. The ceiling wholesale prices are inclusive of incidental charges such as cost of containers, packing and goods freight, but if the wholesaler despatches the consignment by passenger train he shall be entitled in addition to recover from the consignee not more than half the difference between the freight cost actually incurred and he freight cost which would have been incurred if the consignment had been sent by goods train.

5. *Prices of Split quantities of drugs in Parts (i), (ii) and (iv).* When a drug specified in Part (i), (ii) or (iv) is sold by a retailer in loose quantities the price for such loose quantities should be worked out *pro rata* on the price of the packing specified or where two or more packings are specified *pro rata* on the price of the next larger packing specified. The total price so calculated should be rounded off to the nearest anna.

6. *Permissible extra charges for all drugs.* If the retailer has to pay a local octroi, terminal tax or sales tax amounting to 1 per cent or more of the retail value of the drug sold, he may charge extra for such octroi, terminal tax or sales tax provided that the extra charge is separately noted in the cash memo given to the purchaser. Similarly, if a wholesaler has paid octroi, terminal tax or sales tax amounting to 1 per cent or more of the retail value of the drugs sold to a retailer in the same town who does not also have to pay any such octroi or tax in respect of the same consignment, he may charge extra for such octroi or tax from the retailer and the retailer may recover the extra charge from the purchaser, provided that the extra charge is spearately noted in the cash memo given by the retailer.

252

7. *Permissible extra chargecs for drugs in Part (iii).* In the case of drugs specified in Part (iii) only,

(*a*) maximum prices have been shown for the most commonly demanded quantities as well as for drugs sold in their original packings. Where other split quantities are sold, the ceiling price should be worked out *pro rata* according to the prices fixed for the nearest split quantity specified subject to a minimum of two annas. When ceiling prices are specified for chemicals sold loose or in packets or cartons and when split quantities are sold the wholesaler or retailer may charge extra upto the following maxima for containers of the types specified in which such chemicals are sold by him.—

	As. each.
Bottles, phials, jars or pots with cork, stoppers or covers (to contain upto 2 oz.)	2
Bottles, phials, jars or pots with cork, stoppers or covers (to contain 3 to 8o z.)	6
Bottles, phials, jars or pots with cork, stoppers or covers (to contain over 8 oz.)	8

(*b*) retailers whose place of business is situated outside Bombay City may recover from the purchaser the cost of freight incurred by them up to a maximum of 6 annas per lb., *e.g.*, a retailer in a distant city, who incurs freight expenses of 6 annas per lb., on a particular consignment may recover this cost from the purchaser in addition to the ceiling price specified, but a retailer who incurs freight expenses amounting to only 2 annas per lb. may not recover from the purchaser more than 2 annas per lb. in addition to the ceiling price. In the case of Ether and Chloroform, however, for which especially heavy packing is necessary, retailers may recover from the purchaser the actual cost of freight incurred by them even if it amounts to more than 6 annas per lb.

9. *Prices of original packings not specified in Part (iii).* (*a*) When a drug specified in Part (iii) is supplied by the manufacturer, importer or wholesaler in original containers which are not otherwise specified in the Schedule, the following formula should be used to arrive at the controlled wholesale and retail prices.—

The price of 8 ozs. in cartons or bottles should be 5/8 of the price specified for 1 lb. cartons or bottles respectively.

The price of 4 ozs. in cartons or bottles should be 3/8 of the price specified for 1 lb. cartons or bottles respectively.

The price of 1 oz. in cartons or bottles should be 1/8 of the price specified for 1 lb. cartons or bottles respectively.

(*b*) The prices specified in Part (iii) are for 1 lb. original cartons or parcels unless otherwise stated. Where the price of a drug is given in bottle packing, the same price will apply to the same drug packed in a tin unless otherwise stated. Where a drug is sold in a 1 lb. bottle or tin and no price is specified for such packing the bottle or tin may be sold at 8 annas more than the price specified for cartons, parcels or loose quantities. Similarly, where the price specified is for a 1 lb. bottle or tin and a drug is sold in a 1 lb. carton or parcel or in loose quantities, the controlled price of the drug shall be deemed to be reduced by 8 annas.
